

THE WHITE HOUSE
WASHINGTON

June 5, 1957

MEMORANDUM FOR: Chairman, Atomic Energy Commission
Director, Central Intelligence Agency ✓
Deputy Secretary, Department of Defense
(Copy for Under Secretary, Dept.)
Department of State

1. Distribution was recently made of three memoranda from the U.S. Del. at the Disarmament Conference in London:
 - a. An informal memorandum to the Chairman of the USSR Delegation, May 31/57.
 - b. A revision of the May 7 "Policy Recommendations" memorandum (intended to incorporate the changes in the May 22 Stassen memorandum and the decisions taken on May 25 in Washington, as reflected in memorandum of that date approved by the President), May 31/57.
 - c. A copy of the May 7 "Policy Recommendations" memorandum, showing by interlineations and striking through the changes made to produce 1 b.
(1 b. and 1 c. were forwarded May 31/57 by the U.S. Del. in compliance with par. 5 of the May 25 memorandum of decisions taken).
2. The Secretary of State has already taken up with the President the memorandum referred to in 1 a. and questions related thereto.
3. This memorandum concerns only the papers referred to in 1 b. and 1 c. Enclosed are pages, prepared by the State Department and myself to make what we deem necessary changes in item 1 b. to conform to the decisions taken on May 25, to clarify portions of the text, to rectify a geographical error in outlining a very limited U.S. Canada-Soviet aerial inspection zone, to make more clear the intention as to any broadening in U.S. territory of the very limited aerial inspection zone referred to, etc. Reference is also made in these pages to the wish of the DCI to raise again the substantive question of over-all "blueprints."
4. It is desired as rapidly as possible to have your views on the attached pages before or after the OGB meeting today, if possible.

*NSC Review Completed *
